

## THE VALUE OF CREATING VALUE

Long term success is governed by our ability to create value for our customers. Our goal is to create a value chain from order to delivered product by always meeting our customers with flexibility and being available. A delivery from Kongamek should always be perceived as smooth and simple.

We call that sustainable.

First in line.

Life is not a competition. If everybody would be the greatest, then at the same time it would be a state of normality. But then there are things in life that we can not compromise with. Things that needs to be done. Sustainability is one such thing as we see it. Normally we do not brag about our achievements, but here its difficult not to. When it comes working for a sustainable future we at Kongamek take the lead.

# STEP BY STEP IN THE RIGHT DIRECTION

A part of our sustainability work take the shape and form of Several Climate initiatives. They differ a bit in their scope but they all contribute to making our business greener.

## CHARGING POSTS

Our workmates drive environmentally friendly hybrid cars. The electricity we use comes from sun, wind and hydro power plants. With an energy efficiency of up to 80% in favour of electricity compared to diesel and gasoline we drive to and from our customers with a good conscience. And really quiet !!

## DISTRICT HEATING

Fossil fuels is the biggest source of green house gas emissions which contributes to climate change. This not good. This is the reason why we have phased out our use of fossil fuels for heating up our premises. Today our premises are heated by the more environmentally friendly alternative district heating.

## LED-LIGHTING

We have replaced more than 1 300 standard fluorescent lamps with LED Lamps in our premises. This has resulted in 57 % less energy consumption, improved light quality and reduced fire risks. On top of that the life expectancy of our lighting is 4X longer than before.

## MATERIAL AND ENERGY EFFICIENCY

In short this means that we together within the company strive to maximise customer value with our resources. This has resulted in that we today amongst other things have managed to improve the efficiency in our processes and recycle substantially more material than before.

! Find all our climate initiatives at [www.kongamek.com/sustainability](http://www.kongamek.com/sustainability)

# Zero

We want our trollies to make an impression, not a carbon footprint. Our latest addition amongst our products is the Zero series. It has been developed for those who wants to make conscious decision, from order to delivered product.

- ② 25% of the steel is recycled
- ② 100% recycled powder from our own powder coating line
- ② The castors are made in Sweden and the hub is made of 100% recycled plastic, the tread is made of biomanufactured rubber
- ② Packing material, carton , bag and paper in recycled material
- ② Paper tape with cornstarch glue
- ② Assembly intruction in 100% recycled paper
- ② Delivery note in 100% recycled paper
- ② The whole trolley is recyclable

! On the next page you can read about how the Zero serie helps to create new forests.  
**Turn page!**

## HERE TROLLIES BECOMES FORESTS

Adjacent to our premises in Konga, Småland there is a patch of land with young trees. For every trolley sold from our Zero Series we will plant a tree here. The more the forest grows the more dedicated we will become to develop products that are good for the customer, environment and our society.

## SUSTAINABLE ALL THE WAY

we can do a lot on our own, but not everything. Therefore it is very important that our suppliers and partners share our values concerning sustainability. In order to ensure that we share the same set of values we have implemented a code of conduct. This involves amongst other things how we jointly shall ensure good relations, climate and handling of the environment.

## INSPIRATION, JOY AND COURAGE

That our children and young people should be allowed to grow up in a safe and creative environment is too important not to do anything about it. By supporting associations and organizations in the region that promote development in association and business, we contribute to the development of the next generation.

KONGAMEK IS AND SHALL ALWAYS  
REMAIN A SUSTAINABLE COMPANY.  
NOT JUST FOR THE ENVIRONMENT  
BUT ALSO FOR CUSTOMERS AND  
CO WORKERS.

## CLEAN AIR AND COMMON SENSE

Kongamek is and will always be a sustainable company. Not only for the environment, but also for our customers and co workers. As the largest employer in a small town, we should and want to take social responsibility, create participation and a pleasant environment for development. Our workplaces must be physically, mentally and socially healthy, where everyone is treated equally and has the opportunity for well-being both at and outside work.
